## Water Management Policy

The Institute is committed to improve the Management of water and reduce overall water consumption through strategies and action. The institute has been implementing number of national proactively seeks measure to minimize its consumptions.

The campus seeks to become a Zero Waste campus and strive it. In Planning and implementing water strategies a balance approach is needed that maximize opportunity to align with multiple objectives.

- a) Infrastructure:-Ensure plumbing adequacy of water taps and sanitary fixtures. Construct water storage structures to meet campus water requirement and regular upkeep of water tank in the building.
- b) Installation of water efficient, Fixtures, Fittings.
- c) Resilience:-deploy dedicated staff for maintenance of water system in the campus. Update periodic maintenance and repair of leaks.
- d) Campus Engagement and collaboration for the faculty and student on the campus. Landscaping and irrigation:-Development of water resilient landscaping practice. Install less water intensive gardens and lawn, use drought plants that consume less water Use of drip- irrigation system and sprinkler system to conserve water in gardening.

Explore opportunities to incorporate leading water management practices in the campus.
